

REMARKS

Claims 1-16, 20, 21, 26-72, 75, 76, 79, 80, 84, 85, 90 and 91 are pending with claims 1-4, 8, 9, 20 and 21 being independent. Claims 20 and 21 have been amended. Support for the amendments can be found in the specification at page 20, lines 16-21. No new matter has been introduced.

The amendments to claims 20 and 21 are clarifying amendments that do not broaden the claims. These amendments do not raise new issues or require further search and should be entered even though the present rejection is a final rejection.

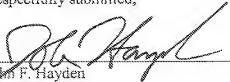

Applicant acknowledges with appreciation the Examiner's allowance of claims 1-16, 26-72, 75, 76, 79, 80, 85, 90 and 91. However, applicant notes that, since claims 75, 76, 79, 80, 84, 85, 90 and 91 depend from rejected claims 20 and 21, those claims presumably also should have been rejected.

Claims 20 and 21 have been rejected under section 112, second paragraph. To address this rejection, claims 20 and 21 have been amended to clarify that the CPU stops an operation of the picture signal processing circuit (claim 20) or a data readout operation of the VRAM (claim 21) while the electroluminescence display device carries out a display by using the analog signals. These amendments are believed to address the Examiner's concerns and, accordingly, the rejection should be withdrawn.

A one month extension fee in the amount of \$120 is being submitted on the Electronic Filing System (EFS) by deposit account authorization. In the event that any fees are due, please apply any charges or credits to deposit account 06-1050.

Respectfully submitted,

Date: 10/2/06
